Dear Friends and Partners,

I am writing this letter from the warm and dry air of Arizona, where Praesto LLC was founded in 2023. The idea for this company began in a very personal moment, when my family moved into a new home and discovered that the window layouts were completely different from the plans. The draperies we ordered no longer fit, and that was when my first real experience with window coverings began.

Until then, I had lived in apartments and college dorms where window coverings were simply there. But this experience allowed me to see the industry through a new lens, as a buyer rather than just a user. I began to look at each product closely, how it was made, how it worked, and how much better it could be. I realized that something so common in daily life could still be made better, safer, and more thoughtful.

That experience planted a seed. I wanted to build a company that listens carefully to people's needs and turns those insights into dependable, well designed, and safe products. Coming from a family with a long history in business and experience in the consumer goods supply chain, I've come to understand how quality products are created and delivered. With that foundation, I decided to take this step and begin the journey with Praesto.

My background in economics taught me that technology and innovation are powerful forces for improving quality of life. At Praesto, product development is not just a business goal, it is our contribution to social progress. We aim to make products that are safe, sustainable, and accessible. Every design begins with a question: how can we make it better for the people who use it? We provide services that people can rely on, and we work to reduce waste in every possible way.

Praesto is still a young company, but we grow every day with your support and feedback. Every new idea, every product, and every improvement comes from the trust and conversations we share with our partners and clients.

Thank you for being part of our story. I hope our products bring comfort, beauty, and ease into your spaces, and that we continue to build this journey together.

Warm Regards

*Jiixin (Emma) Zhang
Founder and CEO, Praesto LLC*

ORDERING GUIDE

A quick guide to selecting, pairing, and ordering complete window shade solutions

Choosing & Pairing Products

Products in this catalog are listed as individual components and collections. Each item may be purchased separately or thoughtfully paired to achieve optimal performance and aesthetics. Hardware components can be color-matched to selected fabrics for a cohesive final appearance.

We are equipped to supply all components required to assemble complete window shades, positioning us as a true one stop solution. Depending on your operational preference, we can support component only sourcing, ready to assemble sets, or fully assembled finished products.

Samples & Evaluation

We are committed to supporting product evaluation through samples. Sample availability varies by product and collection. Please contact our sales team with your sample requests.

We believe products should speak for themselves. There is no better proof of quality and performance than what you can see, touch, and experience firsthand.

Special & Custom Orders

We understand that standard offerings may not meet every project requirement. Special orders are available to accommodate your specific needs. Simply share your requirements with us, and our team will work closely with you to develop the most suitable solution.

Lead Time & Shipping Options

We offer multiple shipping methods to align with your project timeline. Lead times may vary depending on product selection, order configuration, and shipping method. For detailed scheduling and logistics support, please contact our sales team for guidance and recommendations.

COMPANY INTRODUCTION

At Praesto Window Furnishings, we believe products should speak for themselves. There is no better proof than what you can see and experience.

Praesto Window Furnishings delivers a full spectrum of components, fabrics, and complete products. Supported by a dedicated team of engineers and product developers, every development is guided by a commitment to safety, quality, and dependable innovation. Beyond functionality, our aim is to craft experiences that bring comfort, beauty, and ease into everyday life. Our mission is to empower partners worldwide with solutions that deliver both elegance and performance, with a continuous commitment to advancing the standards of our industry.

OUR COMMITMENTS

INNOVATION BEGINS WITH LISTENING.

Through our time in the industry, we have learned that the best ideas often come from the voices of our customers. Every new development starts with real world feedback and a clear purpose, to make products safer, smarter, and simpler to use. Innovation takes time and investment, but we gladly bear that cost to deliver solutions that truly make a difference.

RELIABILITY IS AT THE HEART OF EVERYTHING WE DO.

From your first inquiry to after sales support, we ensure consistent service and clear communication at every step. We manage every order directly, with no third party handling or uncertainty, so that each delivery meets our exacting quality standards.

Your satisfaction is not just a promise, it is our responsibility.

SAFETY COMES BEFORE EVERYTHING ELSE.

All our products are developed and manufactured with strict attention to material safety and compliance. No toxic or harmful substances are used, and every product undergoes rigorous testing to ensure peace of mind in every home and space.

OUR PRODUCTS ARE BUILT TO LAST.

Our current standard warranty covers 3 to 5 years, reflecting our confidence in the durability and reliability of our designs. As we continue to innovate and refine our products, extending this coverage is part of our ongoing commitment to quality and long term value for our partners and clients.

THE HONEYSILK COLLECTION

The collection features fabrics with textures as soft and mousse like as whipped honey, paired with a silky smooth touch that rests gently against the skin. Woven with ultra fine yarns, it offers a softness you feel from the very first touch, a feather light presence that seems to float in the air, and a delicate refined texture that brings subtle depth and beauty. The Honeysilk Collection carries a presence of its own, a gentle softness that adds a quiet layer of luxury and elegance to any home.

Draperies

LIGHTWEIGHT BEAUTY WITH A SILKY TOUCH

Silky and Luxurious Hand Feel

The Honeysilk Collection offers a soft, smooth, skin friendly touch that feels instantly refined. Its silk like softness elevates both comfort and the overall sense of quality.

Quiet and Smooth

The Honeysilk Collection moves quietly and smoothly, creating a noticeably calmer and more pleasant experience.

Ultra Light and Airy

Produced with ultra fine yarns, the finished fabric weighs only about 50 g/m², less than half of traditional fabrics (≈ 120 g/m²). This creates a lighter, softer, and more elegant visual presence.

Visually Elevated

Its refined texture instantly enhance any interior, bringing depth, elegance, and a luxurious atmosphere to the space.

Note:

► When the base fabric is adapted into different shade types, additional treatments may be required to meet functional needs such as structure, stability, or light control. These processes may alter certain characteristics of the original material. As a result, the performance and hand feel of the base fabric may vary across finished window coverings.

PRECISION AND PERFORMANCE

Precision Heat Setting

A carefully refined heat setting process locks in the fabric's structure, ensuring stability over time. The collection remains smooth, well shaped, and reliable over time, maintaining its refined appearance through long term use.

COMPREHENSIVE SAFETY ASSURANCE

Better for the Planet

The production method minimizes chemical emissions and avoids the toxic wastewater often created in traditional non-woven manufacturing, supporting a healthier indoor environment and a cleaner planet.

Clean Production

Environmental adhesive technology is used throughout the process to prevent the release of formaldehyde, VOCs, and other unwanted emissions.

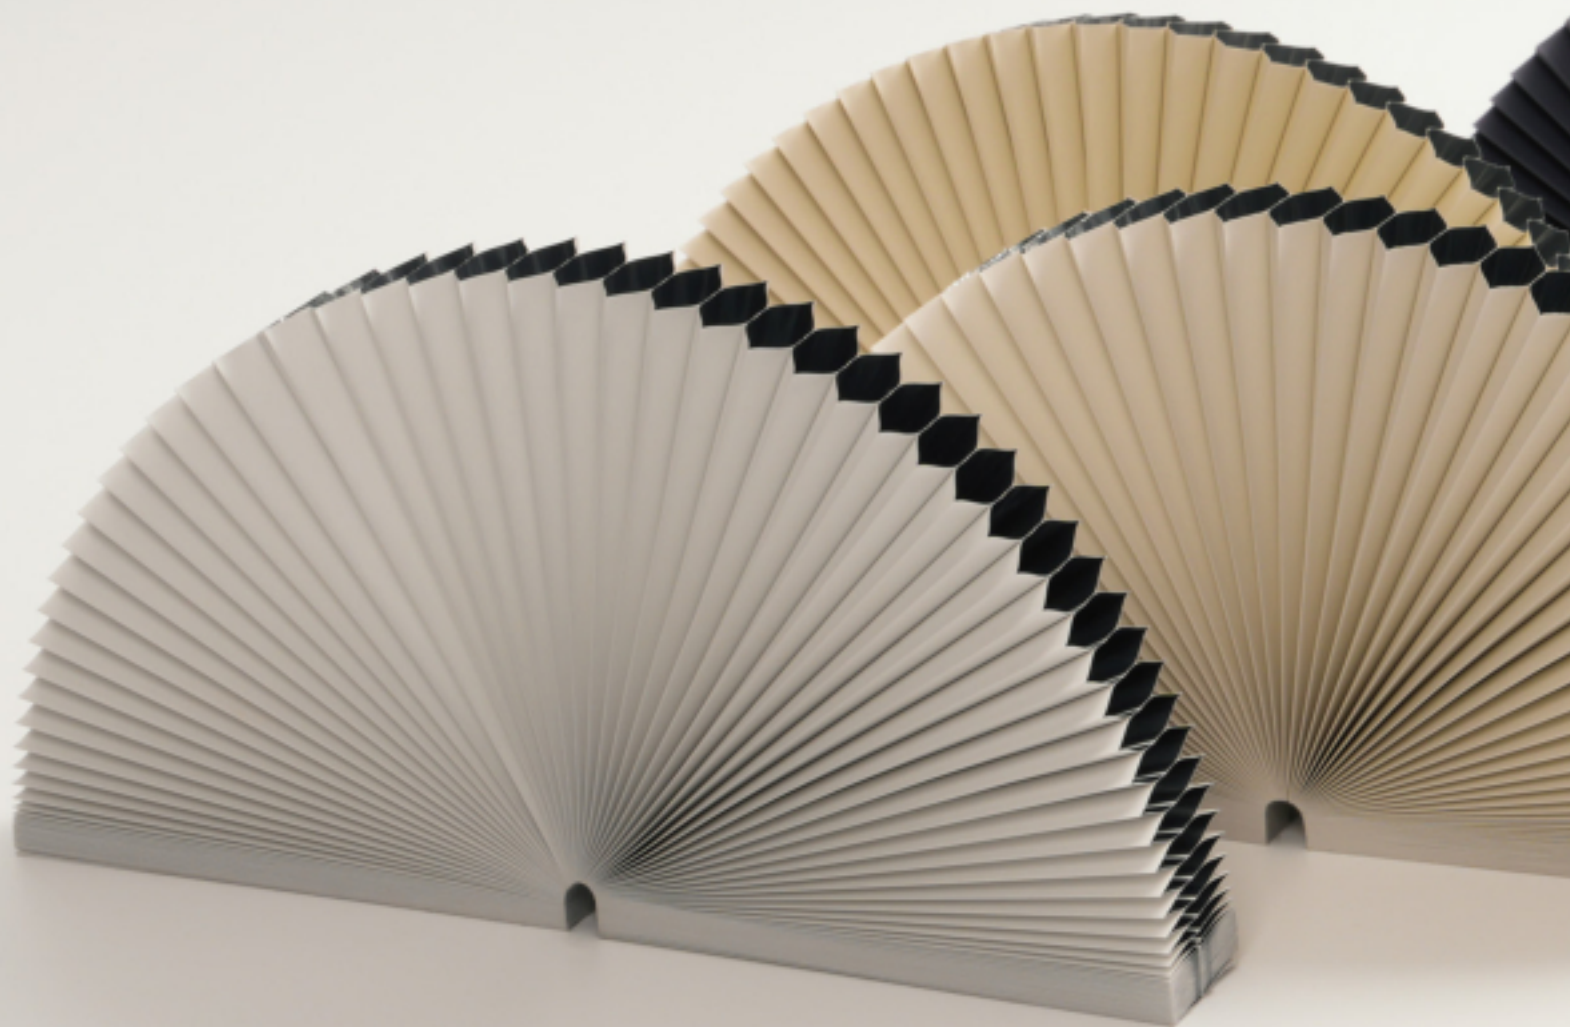

Certified Protection

The Honeysilk Collection is tested to international standards and supported by trusted reports, providing reliable safety for homes, offices, and commercial spaces.

Clean Materials

Made with high-quality virgin and recycled materials to ensure a pure, safe foundation with no harmful residues.

HONEYSILK CELLULAR SHADES

Collection Highlight

Honeysilk Cellular Shades introduce a level of softness never before seen in this category. Traditional cellular fabrics are made from non woven fibers that naturally create a textured feel, and simply switching to a softer material is not possible. Cellular fabrics must stay lightweight, durable, flame retardant, privacy protecting, child safe, and adaptable to special shaped windows. Improving the touch while maintaining all essential performance requires real innovation. After months of research, design, sampling, and testing, our team achieved a breakthrough: a cellular fabric with the silky smooth hand feel we always believed was possible.

Energy Efficiency

Honeysilk Cellular Shades bring a silky smooth touch to cellular fabrics for the first time without compromising performance. The fabric retains excellent energy saving structure and insulation, delivering steady comfort throughout the year.

Innovative Woven Technology

Through proprietary advances in polyester weaving, Honeysilk Cellular Shades overcome the long-standing challenge of excessive skew in woven fabrics for cellular shades. The fabric stays impressively straight and consistent, with less than 1.3 cm of skew across a 3-meter width, far outperforming the usual 2.5 to 3 cm seen in standard materials.

Non Toxic and Clean

Unlike traditional non woven cellular fabrics, Honeysilk is produced using cleaner materials and a more environmentally conscious process. It contains no harmful residues and is safe for everyday use in homes, offices, and commercial spaces.

Quiet in Motion

The rough, noisy feel of non woven cellular fabrics is replaced with smooth, quiet movement. Honeysilk Cellular Shades lift and lower with a calm, gentle motion that noticeably enhances the user experience.

FABRIC PERFORMANCE GRADING OVERVIEW

How to Read the Grading Scales

Our grading scales are designed to help you quickly understand each fabric's performance level. You can use the grades in two ways:

1. Evaluating a Single Fabric

AATCC 16
★★★

This fabric earned a Grade 3 for Colorfastness to Light (AATCC 16) based on our internal evaluation criteria. Official testing can be arranged through a laboratory of your choice.

2. Comparing Different Fabrics

Fabric A	Fabric B
AATCC 16	AATCC 16
★★	★

For example, Fabric A is rated Grade 2 for Colorfastness to Light (AATCC 16), while Fabric B is rated Grade 1. This means Fabric A has better colorfastness, and official lab results would verify this difference.

TESTING STANDARD		GRADING SCALE
AATCC 16	Colorfastness to Light	Grade 1(★) to Grade 5 (★★★★★)
AATCC 16-2004	Colorfastness to Light: Outdoor	Grade 1(★) to Grade 5 (★★★★★)
AATCC 16.3	Colorfastness to Light: Xenon-Arc	Grade 1(★) to Grade 5 (★★★★★)
AATCC 61	Colorfastness to Laundering	Grade 1(★) to Grade 5 (★★★★★)
AATCC 61-2003	Colorfastness to Laundering: Accelerated	Grade 1(★) to Grade 5 (★★★★★)
ISO 105-E03	Color Fastness To Chlorinated Water (Swimming-Pool Water)	Grade 1(★) to Grade 5 (★★★★★)
ISO 105-B02	Xenon Testing	Grade 1(★) to Grade 5 (★★★★★)
AATCC 130	Soil Release: Oily Stain Release	Grade 1(★) to Grade 5 (★★★★★)
AATCC 118-2022	Oil Repellency: Hydrocarbon Resistance	Grade 1(★) to Grade 5 (★★★★★)
AATCC 30	Antifungal Activity, Assessment on Textile Materials: Mild	Grade 1(★) to Grade 5 (★★★★★)
AATCC 90	Antibacterial Activity: Agar Plate	Grade 1(★) to Grade 5 (★★★★★)
AATCC 100	Antibacterial Finishes on Textile Material	Grade 1(★) to Grade 5 (★★★★★)
AATCC 147	Antibacterial Activity of Textile Materials: Parallel Streak	Grade 1(★) to Grade 5 (★★★★★)
ASTM D2261-13	Tearing Strength of Fabrics by the Tongue (Single Rip) Procedure	Grade 1(★) to Grade 5 (★★★★★)
ASTM D3884	Abrasion Resistance of Textile Fabrics (Rotary Platform, Double-Head Method)	Grade 1(★) to Grade 5 (★★★★★)
AATCC 35	Water Resistance: Rain	Grade 1(★) to Grade 5 (★★★★★)
AATCC 183-2020	Transmittance or Blocking of UV Radiation through Fabric	UPF 30+ ~ UPF 80+
ASTM E1050	Impedance and Absorption of Acoustical Materials Using a Tube, Two Microphones and a Digital Frequency Analysis System	dB
AATCC 203	Light Blocking Effect of Textiles: Spectrophotometric Method	0%~99%
NFPA 701	Standard Methods of Fire Tests for Flame Propagation of Textiles and Films	Yes / No

Note: The grading scales shown are based on our internal evaluation standards and do not represent official laboratory test results. All performance levels are converted into our internal 1 to 5 scale to allow easier comparison across different categories. Praesto reserves the right of final interpretation. If an official testing report is required, please contact us and we can arrange testing through the laboratory of your choice.

FABRIC UPGRADE SERVICES

Fabric Finish Options

FEATURE / UPGRADE	DESCRIPTION	TESTING STANDARD	COMPATIBILITY CHECK
Flame Retardant	Flame Retardant upgrade commercial fire safety requirements	NFPA 701	Required
Waterproof	Waterproof upgrade for high humidity areas such as bathrooms and kitchens	AATCC 35	Required
Oil-Repellent	Prevents oil penetration and surface contamination	AATCC 118-2022	Required
Stain-Resistant	Reduces dust and dirt adhesion	AATCC 130	Required
Anti-Mildew / Antimicrobial	Anti-mold and antibacterial treatment using bio-optical technology	AATCC 30/90/100/147 (Staphylococcus aureus & Klebsiella pneumoniae)	Required
UV Protection (UVA / UPF)	To block harmful UV rays	AATCC 183-2020	Required
Sound-absorbing / Noise-reducing	Noise reduction	ASTM E1050	Required

Important Notes:

► **Compatibility Check:**

Upgrade availability depends on the base fabric's properties. Please confirm fabric applicability in advance.

► **Color Accuracy:**

Custom colors are matched to the best of our ability, but a perfect match to provided physical samples or digital files cannot be guaranteed due to differences in material absorption and production batches.

Fabric Structure Options

FEATURE / UPGRADE	DESCRIPTION	TESTING STANDARD	COMPATIBILITY CHECK
Sheer-to-fabric ratio	Adjustable sheer-to-fabric ratio	Based on client requirements	Zebra Shades
Special Shapes / Custom Widths	To meet the widow covering designs for specialty windows	Based on drawings	Required

► Sheer-to-fabric Ratio option is only for zebra shades

Fabric Property Options

FEATURE / UPGRADE	DESCRIPTION	TESTING STANDARD	COMPATIBILITY CHECK
Custom Weight	Can be adjusted for desired weight or light control	mm / gsm	Roller Shades, Roman Shades, and Drapery
Light & Privacy Control	Options for light-filtering or blackout	AATCC 203	/
Cell Size / Double Cell	Adjustable cell size, can be upgraded to double cell	Based on client requirements	Required

► Custom Weight option is only for roller shades, Roman shades, and drapery. Cell Size / Double Cell option is only for cellular shades

Custom Design Options

FEATURE / UPGRADE	DESCRIPTION	TESTING STANDARD	COMPATIBILITY CHECK
Color	Custom color matching available for any Pantone reference.	Color difference \geq Grade 3-4 (Grey Scale Testing)	/
Pattern	Eco-friendly digital transfer printing	Colorfastness \geq 3.5 (AATCC16/61)	/

Coating and Lamination Options

FEATURE / UPGRADE	DESCRIPTION	TESTING STANDARD	COMPATIBILITY CHECK
Double-sided PVC PVC with foam coating flocking, 2-3 layer lamination and other options	Enhances blackout waterproof, oil-repellent or sound-absorbing performance	Based on client requirements	Required

► Not for cellular shades

Eco-Friendly Material Options

FEATURE / UPGRADE	DESCRIPTION	TESTING STANDARD	COMPATIBILITY CHECK
Recycle / PUR adhesives	Environmental friendly and sustainable processing	OEKO-TEX / REACH / SGS	/

► Only for roller shades, Roman shades, and drapery
